BHUMI HIRAPARA

UI UX Designer & Developer

About Me

I am a senior UI/UX designer with over five years of experience in the field. I have worked with clients of all sizes, from small businesses to enterprise-level organizations. My skills include user research, wireframing, and creating high-fidelity prototypes. I am also experienced in working with agile development teams and using various design tools such as Figma, Adobe XD, Sketch and Invision.

In my current role, I am responsible for leading the design of a large e-commerce website. This has included conducting user research, designing wireframes and prototypes, and working closely with the development team to ensure that the final product meets the needs of our users.

Through my work, I have been able to help improve the usability of websites and apps for my clients, resulting in increased customer satisfaction and conversions. I am passionate about using my skills to create designs that are both user-friendly and visually appealing
